DUST COLLECTORS

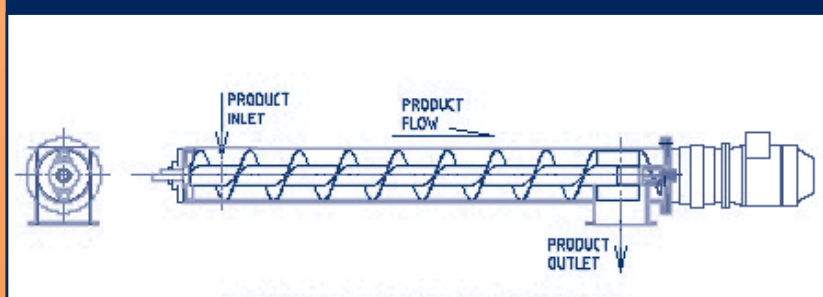

Fast Track collectors are a balanced range of highly efficient units incorporating fabric filters with automatic sequential reverse jet cleaning, specifically designed as a cost effective solution for most dust control problems.

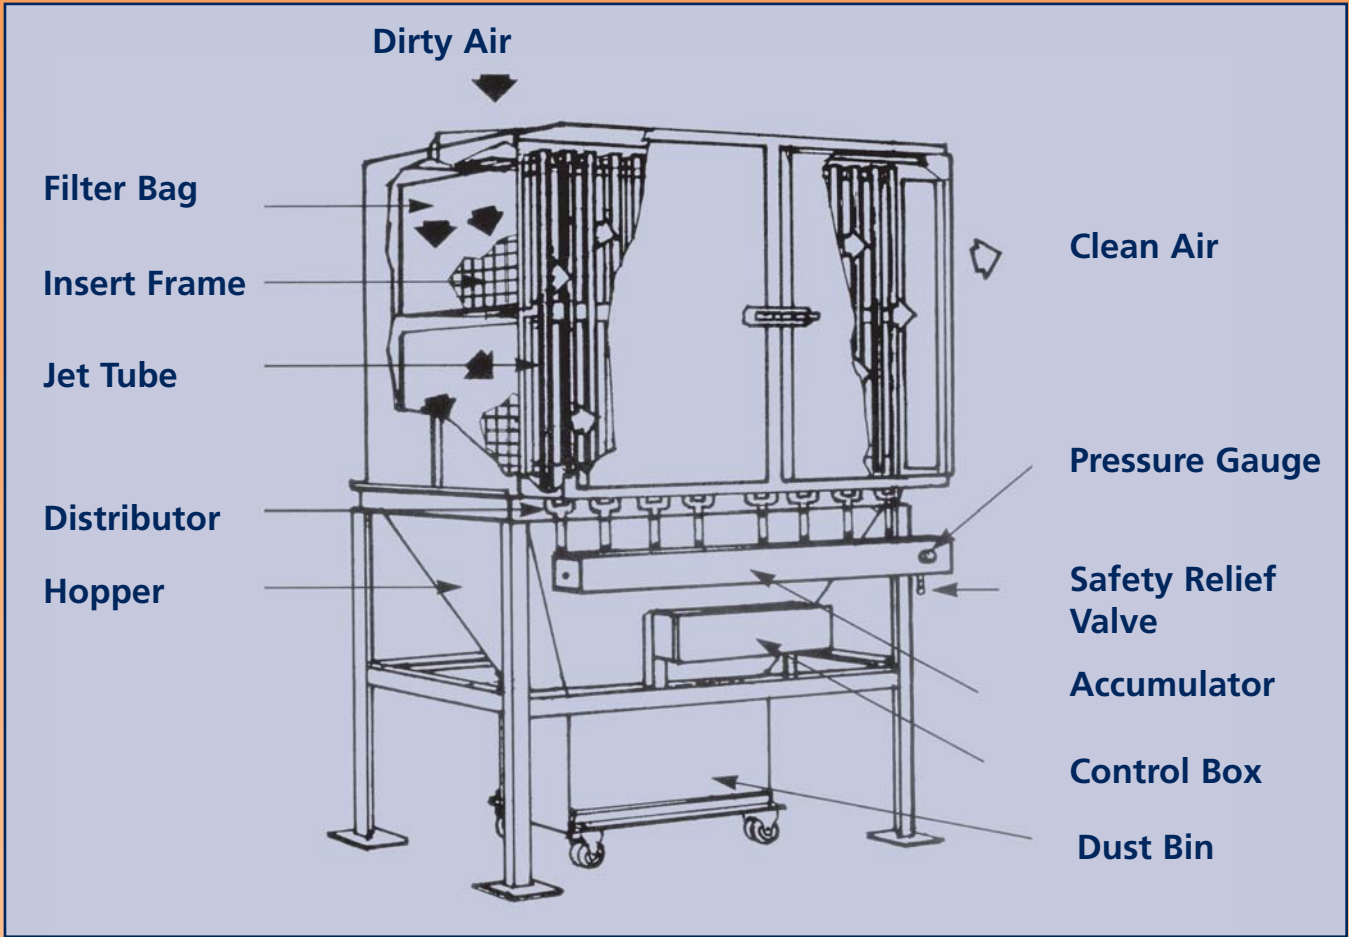

Rotary Valve

Screw Conveyor for Transportation of Starch & Granulated Products

In many if not all industries the extraction of dust became a major issue not to be ignored.

An efficient dust collection and dust removal not only protects the environment, but also improves working conditions whereby people are protected from illness and unwanted accidents.
